Sir:

RESPONSE

Responsive to the Official Action dated July 10, 2007, the applicants elect, with traverse, the subject matter of the Examiner's Group I. Reconsideration and withdrawal of the lack of unity assertion and examination of all of the claimed subject matter are requested.

The Examiner is requested to at least examine the subject matter of the Examiner's Groups I and II as the subject matter shares a common inventive concept, the claims of the Examiner's Groups I and II are not independent and distinct and search and examination of the claims of the Examiner's Groups I and II will not be an undue burden.

Specifically, the applicants believe that in the subject matter of the Examiner's Groups I and II a yield increase was obtained for plants that had increased expression

Response

of a class 2 non-symbiotic haemoglobin. The general inventive concept shared by the subject matter of the Examiner's Groups I and II is that a yield increase may be obtained by increasing the expression of a class 2 non- symbiotic haemoglobin, regardless of the growth conditions of the plant.

Withdrawal of the lack of unity assertion, at least with regard to the subject matter of the Examiner's Groups I and II, is requested along with an early and favorable Action on the merits of the claims of the Examiner's Groups I and II.

Respectfully submitted,

NIXON & VANDERHYE P.C.
